

Ultimate Rockstone Empire

Natural Stone Square Modular Unit

A balanced square module for premium exterior architecture and landscape applications.

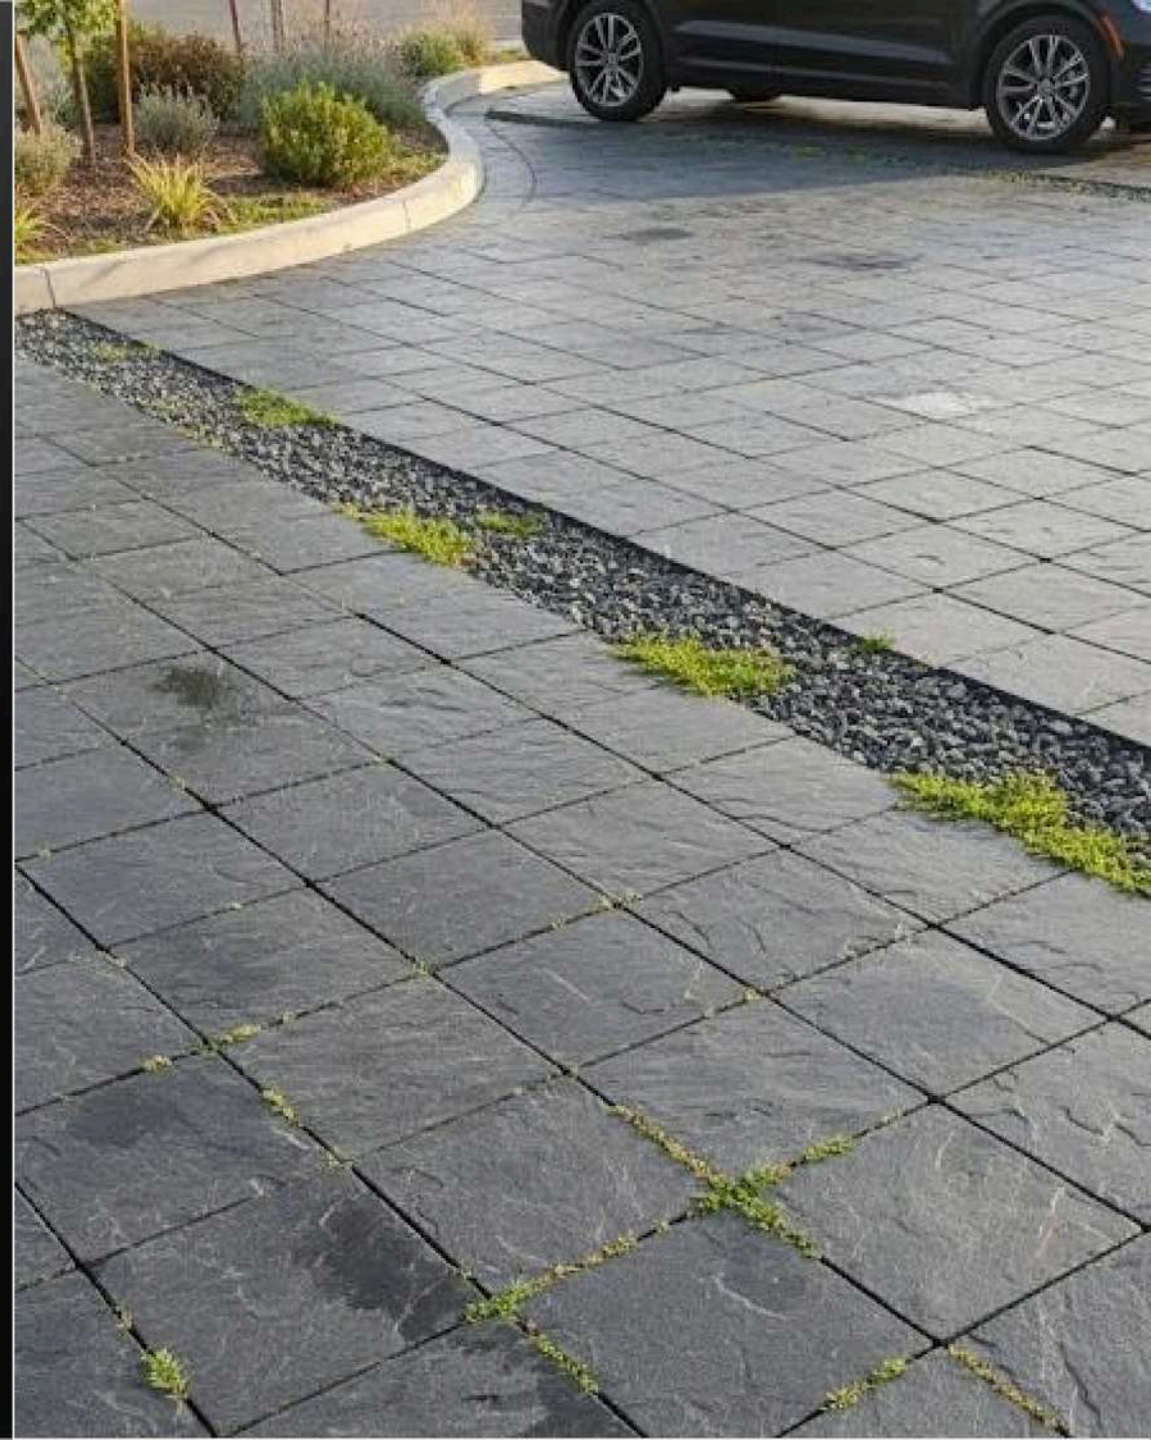

Product Overview

- The **30×30×5cm Natural Stone Modular Unit** is a precision-cut, load-bearing stone element developed for projects where **material quality, proportion, and durability** are critical.
- Its square geometry offers visual balance, while the increased thickness allows confident use across **exterior flooring, courtyards, and landscape zones**.

Material & Performance

- Excellent durability for outdoor and semi-outdoor applications
- Low heat absorption compared to concrete alternatives
- High resistance to wear, weathering, and surface erosion
- Suitable for heavy foot traffic and vertical applications

Product Specifications:

Monsoon Natural Stone

Thickness:

2 inch ($\approx$ 50 mm / 5 cm)

Module Size:

- 12× 12inch (30 x 30 cm)

Finish:

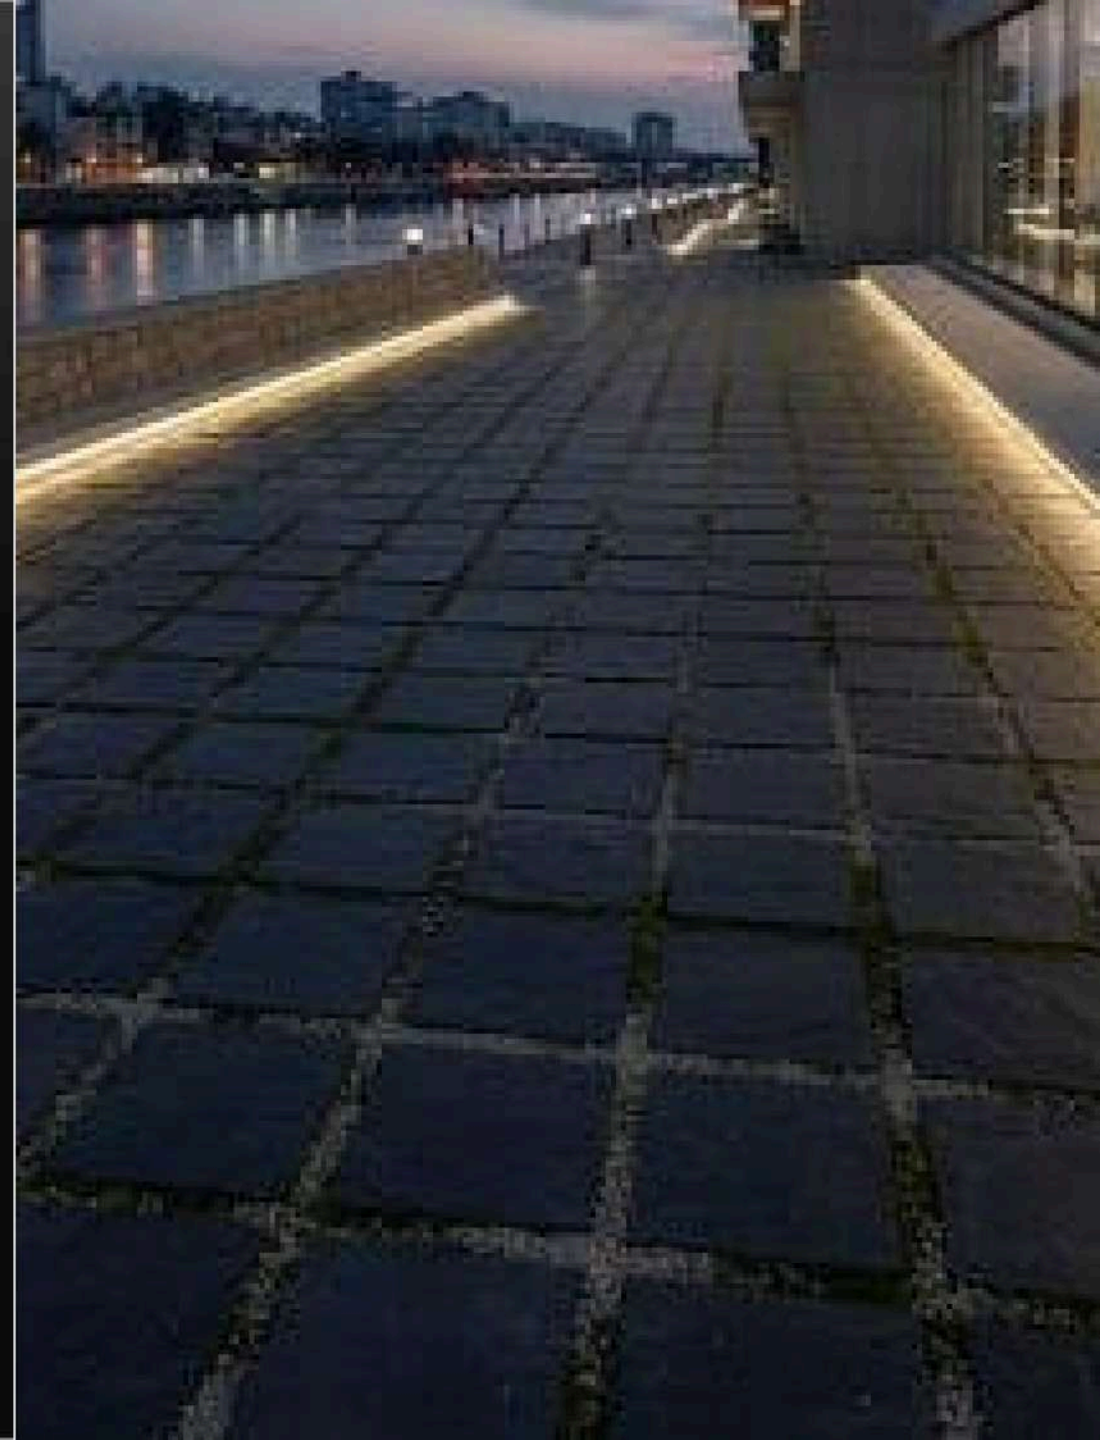

- Natural/Textured Stone surface.

Uniform thickness ensures predictable installation and finish quality.

Why 30 × 30 cm?

The 30 × 30 cm module offers a balanced visual scale—neither too fragmented nor overly minimal.

Works equally well in linear and grid layouts

Recommended Uses Portal

- Verandahs, sit-outs, and semi-outdoor zones
- Walkways and pedestrian pathways
- Landscape paving and garden paths
- Entry zones and transitional spaces
- Especially suited for areas where people **walk, pause, and interact** with the surface.

On-Site Advantages

- Square format simplifies layout planning.
- Reduces cutting and material wastage
- Allows easy replacement of individual units if required.
- Compatible with standard paving installation methods.
- Ensures clean execution with long-term serviceability.

A Premium, Limited- Availability

This $30 \times 30 \times 5$ cm stone unit is not commonly available in the market, especially in consistent quality and thickness.

It is suited for:

- High-end residential projects
- Boutique hospitality and resorts
- Architect-led landscape developments
- Positioned for projects where material selection is intentional.
